WE Cork Flooring - CLASSIC COLLECTION

Maintenance Instructions:

Do not wash for at least 5 days. Sweep or vacuum the floor frequently to avoid buildup of abrasive material. Clean the floor with Bona wood floor cleaner (or equivalent), following the instructions on the bottle (avoid use of excess water on the floor). Occasionally, Bona wood floor refresher may be used to rejuvenate the finish. Products containing wax should never be used on urethane-finished floors.

Wax tiles can be treated with a good quality paste wax and buffed with an electric buffing machine with a lamb's wool pad. For heavy cleaning, remove old dirt and wax with a purple abrading pad and re-apply wax.

Urethane/Greenshield tiles can be treated with a liquid polish (never wax) and buffed. To refinish, use a buffing machine with 150-grit paper and follow Finish manufacturer's instructions. If you wish to seal a pre-finished floor with additional coats of polyurethane, we suggest a water-based product.
